HQ - High-Quality

- sehr hohe Druckqualität
- gestochen scharfes Druckbild
- speziell für die Uhrenindustrie entwickelt
- sehr hohe Konturenschärfe
- gibt alle Farbe ab, d.h. keine Restfarbe am Tampon
- super Zeichnungseigenschaften
- mehr Farbauftrag als herkömmliche Drucktampons

Wir produzieren die HQ-Tampons in folgenden Härten:

ca. 50 Shore 00

ca. 60 Shore 00

ca. 70 Shore 00 -

Auch andere Härten sind auf Anfrage möglich.

HQ - Haute qualité

- très haute qualité d'impression
- Image d'impression très nette
- spécialement développé pour l'industrie horlogère
- très grande netteté des contours
- donne toute l'encre, c'est-à-dire pas d'encre résiduelle sur le tampon
- super propriétés de dessin
- plus de dépôt d'encre que les tampons d'impression traditionnels

Nous produisons les tampons HQ dans les duretés suivantes:

env. 50 Shore 00

env. 60 Shore 00

env. 70 Shore 00

D'autres duretés sont également possibles sur demande.

HQ - High-Quality

- very high print quality
- razor-sharp print image
- specially developed for the watch industry
- very high contour sharpness
- releases all ink, i.e. no residual ink on the pad
- super drawing properties
- more ink application than conventional printing pads

We produce HQ pads in the following hardnesses:

approx. 50 Shore 00

approx. 60 Shore 00

approx. 70 Shore 00

Other hardnesses are also available on request.

TA - Antistatik - Drucktampons

Dieser Drucktampon verfügt über ein ausgezeichnetes Antistatikverhalten, d.h. keine Spritzer mehr.

- sehr gutes Antistatikverhalten
- keine Staubanziehung
- sehr gute mechanische Beständigkeit
- lange Lebensdauer
- ausgezeichnete Farbübertragung

wir produzieren die TA-Tampons in folgenden Härten:

ca. 40 Shore 00

ca. 50 Shore 00

ca. 60 Shore 00

ca. 70 Shore 00

auch andere Härten sind auf Anfrage möglich
bis max. 80 Shore 00

TA - Antistatique - Tampons d'impression

Ce tampon d'impression a d'excellentes propriétés antistatiques, c'est-à-dire qu'il n'y a plus d'éclaboussures.

- très bon comportement antistatique
- pas d'attraction de la poussière
- très bonne résistance mécanique
- longue durée de vie
- excellent transfert de couleur

Nous produisons les tampons TA dans les duretés suivantes :

env. 40 Shore 00

env. 50 Shore 00

env. 60 Shore 00

env. 70 Shore 00

d'autres duretés sont également possibles sur demande jusqu'à 80 Shore 00 max

TA - Antistatic - Printing pads

This pressure pad has excellent anti-static properties, i.e. no more splashes.

- very good antistatic properties
- no dust attraction
- very good mechanical resistance
- long service life
- excellent ink transfer

We produce TA pads in the following hardnesses:

approx. 40 Shore 00

approx. 50 Shore 00

approx. 60 Shore 00

approx. 70 Shore 00

Other hardnesses are also available on request
up to max. 80 Shore 00

LL - Longlife

Dieser Drucktampon zeichnet sich aus durch eine sehr hohe Reissfestigkeit auch bei Drucken über Kanten, sehr hohe Standzeit, quillt nicht auf, d.h. keine Geisterbilder, eignet sich deshalb auch ausgezeichnet für Glasfarben.

- sehr lange Lebensdauer
- mechanisch äußerst hohe Beständigkeit
- quillt weniger auf
- geeignet für aggressive Farben und Härter
- extrem hohe Standzeit
- weniger Geisterbilder

wir produzieren die LL-Drucktampons in folgenden Härten:

ca. 50 Shore 00

ca. 60 Shore 00

ca. 70 Shore 00

auch andere Härten sind auf Anfrage möglich

LL - Longlife

Ce tampon d'impression se caractérise par une très grande résistance à la déchirure, même lors d'impressions sur des bords, une durée de vie très élevée, ne gonfle pas, c'est-à-dire qu'il n'y a pas d'images fantômes, il convient donc aussi parfaitement aux encres pour verre.

- très longue durée de vie
- Résistance mécanique extrêmement élevée
- gonfle moins
- convient aux encres et durcisseurs agressifs
- Durée de vie extrêmement élevée
- moins d'images fantômes

Nous produisons les tampons d'impression LL dans les duretés suivantes :

env. 50 Shore 00

env. 60 Shore 00

env. 70 Shore 00

D'autres duretés sont également possibles sur demande.

LL - Longlife

This printing pad is characterised by a very high tear resistance even when printing over edges, very long service life, does not swell, i.e. no ghosting, and is therefore also excellently suited for glass inks.

- very long service life
- extremely high mechanical resistance
- less swelling
- suitable for aggressive inks and hardeners
- extremely long service life
- less ghosting

We produce the LL printing pads in the following hardnesses:

approx. 50 Shore 00

approx. 60 Shore 00

approx. 70 Shore 00

Other hardnesses are also available on request

RB - Drucktampons

Dieser Drucktampon aus einem bewährten Standardsilikon, verfügt über eine sehr gute Standzeit und ist mechanisch belastbar. Mit diesem Silikon können auch „Supertrockene“ Tampons hergestellt werden um Abdrucke auf hochglänzenden Oberflächen zu verhindern.

- Standardsilikon
- hohe Reissfestigkeit
- gute mechanische Beständigkeit
- gutes Druckergebnis
- universell einsetzbar

wir produzieren die RB-Drucktampons in folgenden Härten:

ca. 40 Shore 00

ca. 50 Shore 00

ca. 60 Shore 00

ca. 70 Shore 00

auch andere Härten sind auf Anfrage möglich bis max. 80 Shore 00

RB - Tampons d'impression

Ce tampon d'impression est fabriqué à partir d'un silicone standard éprouvé, a une très bonne durabilité et est mécaniquement résilient. Ce silicone peut également être utilisé pour produire des tampons „super secs“ afin d'éviter les empreintes sur les surfaces brillantes.

- Silicone standard
- grande résistance à la déchirure
- bonne résistance mécanique
- bon résultat d'impression
- Utilisation universelle

Nous produisons les tampons d'impression RB dans les duretés suivantes :

env. 40 Shore 00

env. 50 Shore 00

env. 60 Shore 00

env. 70 Shore 00

D'autres duretés sont également possibles sur demande jusqu'à 80 Shore 00 au maximum.

RB - Printing pads

This printing pad is made of a proven standard silicone, has a very good service life and is mechanically resilient. This silicone can also be used to produce „super dry“ pads to prevent impressions on high-gloss surfaces.

- Standard silicone
- High tear resistance
- Good mechanical resistance
- Good printing results
- Universally applicable

We produce the RB printing pads in the following hardnesses:

approx. 40 Shore 00

approx. 50 Shore 00

approx. 60 Shore 00

approx. 70 Shore 00

Other hardnesses are also available on request up to max. 80 Shore 00

OL - Drucktampons

- sehr gute Farbübertragung
- gute mechanische Beständigkeit
- hohe Reißfestigkeit
- wird auch in der Uhrenindustrie eingesetzt
- gutes Druckergebnis
- universell einsetzbar

wir produzieren die OL-Drucktampons in folgenden Härten:

ca. 40 Shore 00

ca. 50 Shore 00

ca. 60 Shore 00

ca. 70 Shore 00

auch andere Härten sind auf Anfrage möglich
bis max. 80 Shore 00

OL - Tampons d'impression

- très bon transfert d'encre
- bonne résistance mécanique
- haute résistance à la déchirure
- est également utilisé dans l'industrie horlogère
- bon résultat d'impression
- Utilisation universelle

Nous produisons les tampons d'impression OL dans les duretés suivantes :

env. 40 Shore 00

env. 50 Shore 00

env. 60 Shore 00

env. 70 Shore 00

d'autres duretés sont également possibles sur demande jusqu'à 80 Shore 00 max

OL - Printing pads

- very good ink transfer
- good mechanical resistance
- high tear resistance
- also used in the watch industry
- good printing results
- universally applicable

We produce OL printing pads in the following hardnesses:

approx. 40 Shore 00

approx. 50 Shore 00

approx. 60 Shore 00

approx. 70 Shore 00

Other hardnesses are also available on request
up to max. 80 Shore 00

FDA - Drucktampons

- FDA-Drucktampons für medizinische Anwendung
- FDA-Drucktampons für den Lebensmittelbereich
- FDA konform
- BfR konform
- mechanisch gute Beständigkeit
- Tamponschaft / - basis aus Aluminium

wir produzieren die FDA-Drucktampons in folgenden Härten:

ca. 50 Shore 00

ca. 60 Shore 00

auch andere Härten sind auf Anfrage möglich.

FDA - Tampons d'impression

- Tampons d'impression FDA pour application médicale
- Tampons d'impression FDA pour le secteur alimentaire
- conforme à la FDA
- conforme au BfR
- bonne résistance mécanique
- Tige / base du tampon en aluminium

Nous produisons les tampons d'impression FDA dans les duretés suivantes :

env. 50 Shore 00

env. 60 Shore 00

d'autres duretés sont également possibles sur demande.

FDA - Printing pads

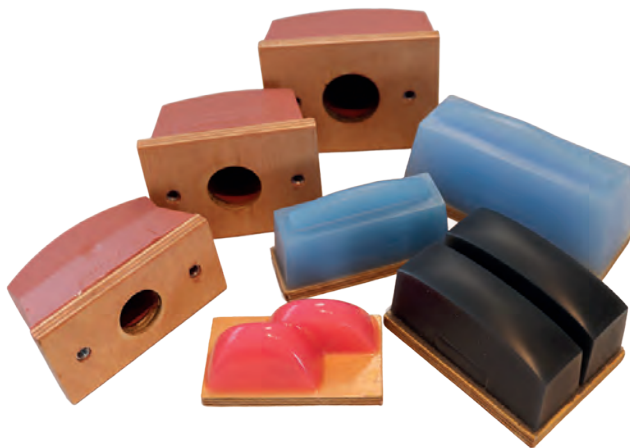

- FDA pressure pads for medical applications
- FDA pressure pads for the food sector
- FDA compliant
- BfR compliant
- good mechanical resistance
- Pad shaft / base made of aluminum

We produce the FDA printing pads in the following hardnesses:

approx. 50 Shore 00

approx. 60 Shore 00

other hardnesses are also possible on request.

Sondertampons

- Wir fertigen auch Kundenspezifische Sondertampons je nach deren Anforderungen.
- Sondertampons können wir in verschiedenen Silikonen und Härten fertigen.
- Auch können wir fast jeden Tampon mit einem Hohlraum versehen, was speziell bei gewölbten oder zerbrechlichen Druckgegenständen von Vorteil ist.

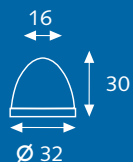

Tampons d'impression spéciaux

- Nous fabriquons également des tampons spéciaux sur mesure, en fonction des besoins de nos clients.
- Nous pouvons fabriquer des tampons spéciaux en différents silicones et duretés.
- Nous pouvons également munir presque tous les tampons d'une cavité, ce qui est particulièrement avantageux pour les objets imprimés bombés ou fragiles.

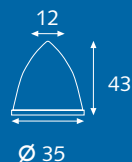

Special pads

- We also manufacture customized special tampons according to your requirements.
- We can manufacture special pads in various silicones and hardnesses.
- We can also provide almost any pad with a cavity, which is particularly advantageous for curved or fragile printed objects.
